GRILLE

The front grille has an air control system through the delicate moving up and down of the central switch. The polystyrene foam to guarantee a major protection in case of penetration of insects. The frame of the hardhat is the perfect coordination of three interconnecting parts that leave sinuous paths for a great air circulation. The high-tech polystyrene is in double density foam for a better shock absorption.

LÜFTUNGSGITTER

Das vordere Lüftungsgitter verfügt über ein Belüftungssystem, das sich durch leichtes Verschieben des Knopfes in der Mitte regulieren lässt. Der Polystyrolschaum garantiert größtmöglichen Schutz im Fall eines Eindringens von Insekten. Die Grundstruktur des Helms ist das perfekte Zusammenspiel von drei miteinander verbundenen Teilen, die gewundene Pfade für eine hervorragende Luftzirkulation freilassen. Das Hightech-Polystyrol besteht aus doppeltdichtem Schaum zur besseren Stoßabsorption.

AIR CONTROL SYSTEM

The perfect and homogeneous air circulation keeps the head always cool and dry. Hot air generated by the head temperature speed out to outer surface and through the rear channels. The peak is flexible in order to avoid fractures during a fall.

BELÜFTUNGSSYSTEM

Die perfekte, gleichmäßige Luftzirkulation hält den Kopf immer kühl und trocken. Die warme Luft, die durch die Temperatur des Kopfs entsteht, strömt durch die Kanäle auf der Rückseite nach außen. Der Schirm ist flexibel, um Knochenbrüche bei einem Sturz zu vermeiden.

CHIN-STRAP

Five point harness fitted with the hardhat support system. The chinstrap directly inserted in the hardhat through three passing rings is completely in smooth non-allergic and washable leather. The rivets are not in contact with the skin. This has been studied to avoid skin disorders.

KINNRIEMEN

Fünf-Punkt-Gurt, der an der Helmschale befestigt ist. Der Kinnriemen führt durch drei Ringe direkt in die Helmschale und besteht komplett aus weichem, antiallergischen und waschbarem Leder. Die Nieten haben keinen Kontakt mit der Haut. Dies wurde getestet, um Hautirritationen zu vermeiden.

INNER PAD

The one-piece inner padding is attached to an anatomic cushion that perfectly fits the nape ensuring optimum comfort and absolute air diffusion thanks to the high-tech materials used: Coolmax® coupled with open-cells filter and smooth Sanitized treated micro-fibre. The inner pad can also be bought separately as spare-part.

REMOVE AND REPLACE THE INNER PAD

1. Raise the front part and then the lateral parts of the padding stick from the helmet.
2. Detach the inner pad from the "Velcro" placed on the polystyrene foam.
3. Remove the pad. Once the pad is washed and dry, fit in again the lateral parts of the padding stick.
The central part of the stick remains partly lifted so as to allow air confluence.
4. Dress again the rest of the pad inside the crown with a light pressure of the hands over the "Velcro" placed on the lateral and rear parts of the polystyrene foam.

INNENPOLSTER

Die Einteilige Innenpolsterung ist an ein anatomisches Kissen angefügt, welches sich perfekt der Nackenform anpasst und dadurch optimalen Komfort bietet. Eine perfekte Luftverteilung ist durch folgendes High-Tech-Material gewährleistet: Coolmax® ist mit einem Filter mit offenen Zellen gekoppelt und weiches hygienisches Mikrofaser. Das Innenpolster kann separat gekauft werden.

ENTFERNEN UND EINSETZEN DES INNENPOLSTER

1. Heben Sie den vorderen Teil an und lösen sie die seitlichen Polsterteile aus dem Helm.
2. Lösen sie das Innenpolster von dem Klettverschluss ,welches auf dem Kunststoff befestigt ist.
3. Entfernen sie das Innenpolster. Sobald das Pad gewaschen und getrocknet ist, fügen sie wieder die seitlichen Polsterteile in den Helm. Der mittlere Teil des Helm bleibt ohne Klettverschluss, damit die Luftzirkulation gewährleistet ist.
4. Fügen sie nun den Rest von dem Pad in den Helm und drücken sie mit leichtem Druck das Pad gegen den hinteren Klettverschluss.

Characteristics Eigenschaften

- Entry level helmet: Chromo Mat
- 3 different external coatings: Textile (T), Mica (M), Polish (P)
- Unique air control system
- Optimum protection
- Weight: 400 gr
- Two shell sizes (M and L) with inner pad adjustable for every size
- Available in multiple colors and color combinations
- INSPEC certificate: optimum safety

- Einsteigerhelm: Chromo Mat
- 3 verschiedene Außenbeschichtungen: Textil (T), Mica (M), Polish (P)
- einzigartiges Belüftungssystem
- optimaler Schutz
- Gewicht: 400 g
- zwei Schalengrößen (M und L) mit Innenpolster, das sich auf jede Größe einstellen lässt
- erhältlich in vielen Farben und Farbkombinationen
- INSPEC Zertifikat: optimale Sicherheit

Personalize Personalisieren

A personal monogram or name engraved on a metallic tag imbues your helmet with distinctive personality. On request, all models can be airbrushed with the colors of a team or a country flag or other personalization ad hoc.

Ein persönliches Monogramm oder Ihr Name, eingraviert auf einem Metallschild, verleiht Ihrem Helm eine besondere Note. Auf Wunsch können alle Modelle kurzfristig in Air-Brush-Technik mit Teamfarben, Länderflaggen oder persönlichen Motiven verziert werden. Der Kinnriemen ist farblich passend zum Helm erhältlich. Vergessen Sie nicht das Innenpolster zu bestellen. Der Kinnriemen ist verfügbar in Leder und farblich tonig zu der Helmfarbe.

INTERPHONE

INTERPHONE

ART.NR.

BCOT36720A3

Kep Italia, along with its partner Comby System has studied and developed Kep Interphone: a device for wireless communication suitable for all models of Cromo equestrian hats that has the aim of allowing the user to move and communicate safely. The system allows you to talk-converse on speakerphone with other users without the hassle of connection wires, receive and share mobile calls, listen to MP3 music and receive GPS directions.

An innovative concept founded on the idea of providing communication during sport, work and free time, without interfering with the user's activities.

Kep Italia hat zusammen mit dem Partnerunternehmen Comby System das Kep Interphone entwickelt: ein kabelloses Kommunikationssystem, das sich für alle Helmmodelle Cromo eignet und dem Träger die Möglichkeit bieten soll, sich sicher zu bewegen und sicher zu kommunizieren. Das System ermöglicht es, über eine Freisprecheinrichtung mit den anderen Kommunikationspartnern zu sprechen und zu kommunizieren, ganz ohne störenden Kabelsalat. Außerdem kann man Anrufe vom Handy entgegennehmen oder mit anderen teilen, Musik über den MP3-Player hören und Anweisungen vom Navigationssystem entgegennehmen.

Es handelt sich um ein innovatives Konzept aufbauend auf der Idee, dass Kommunikation auch während des Sports, der Arbeit und der Freizeit möglich sein muss, ohne die Tätigkeit des Nutzers negativ zu beeinflussen.
